

Richard's Candlestick Cheat Sheet

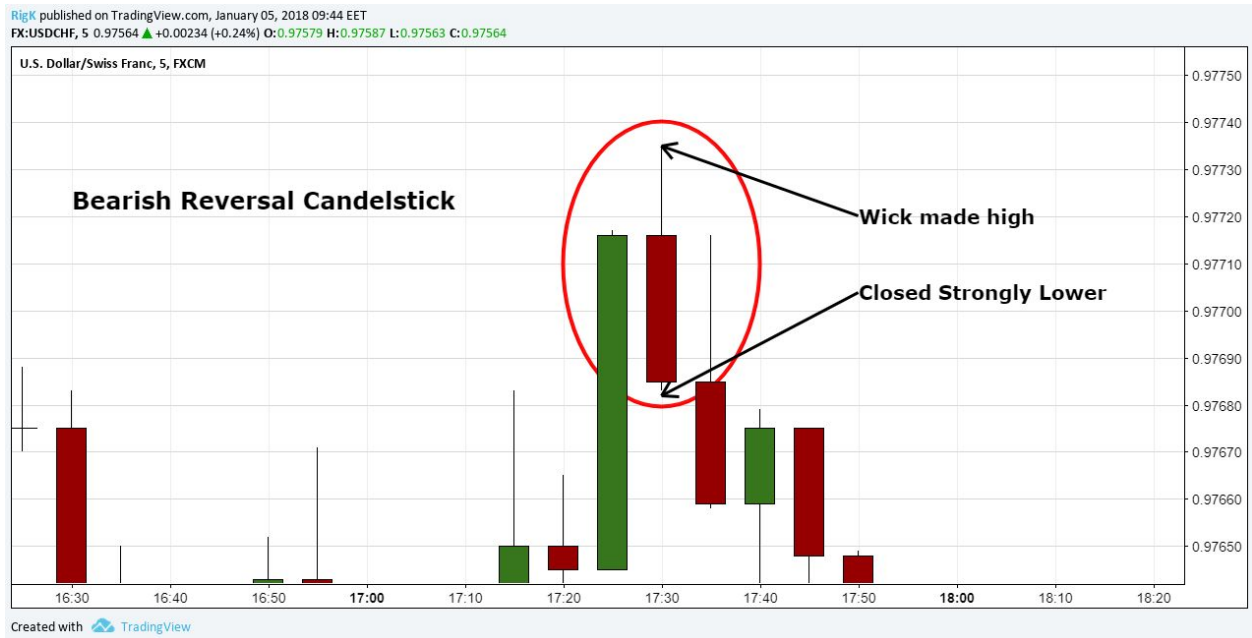

When I'm analyzing a market, **there are only 3 candlestick patterns** that I'm worried about.

Over the last decade, they have proven to be the most accurate at confirming entries at the areas I want to trade.

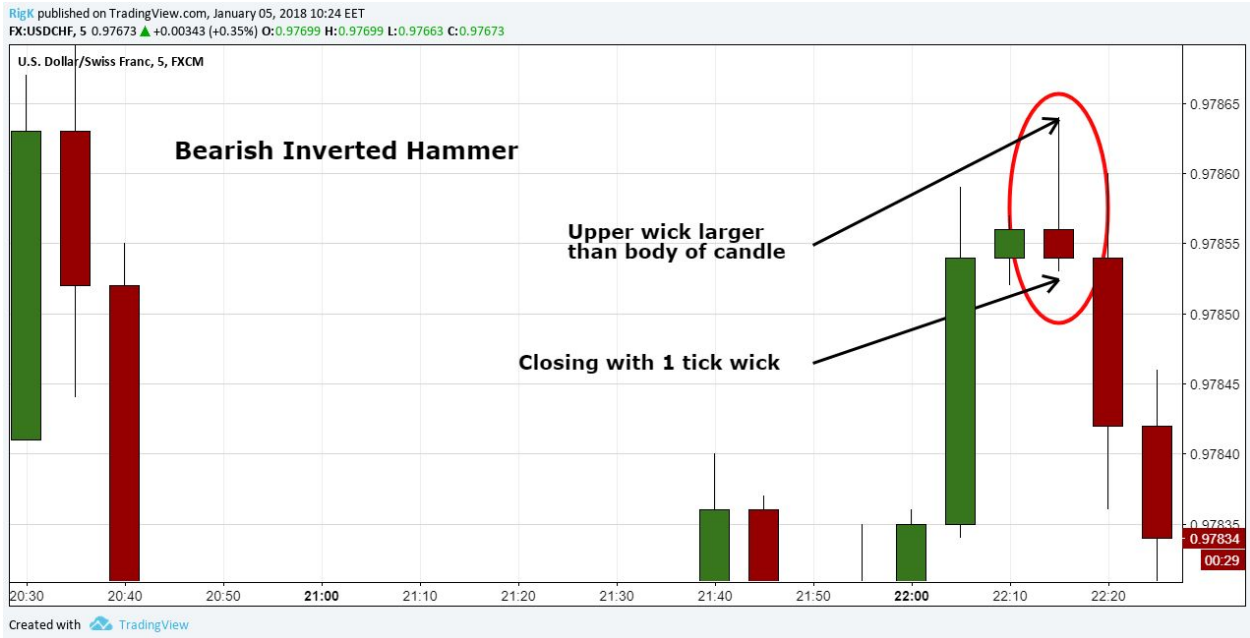

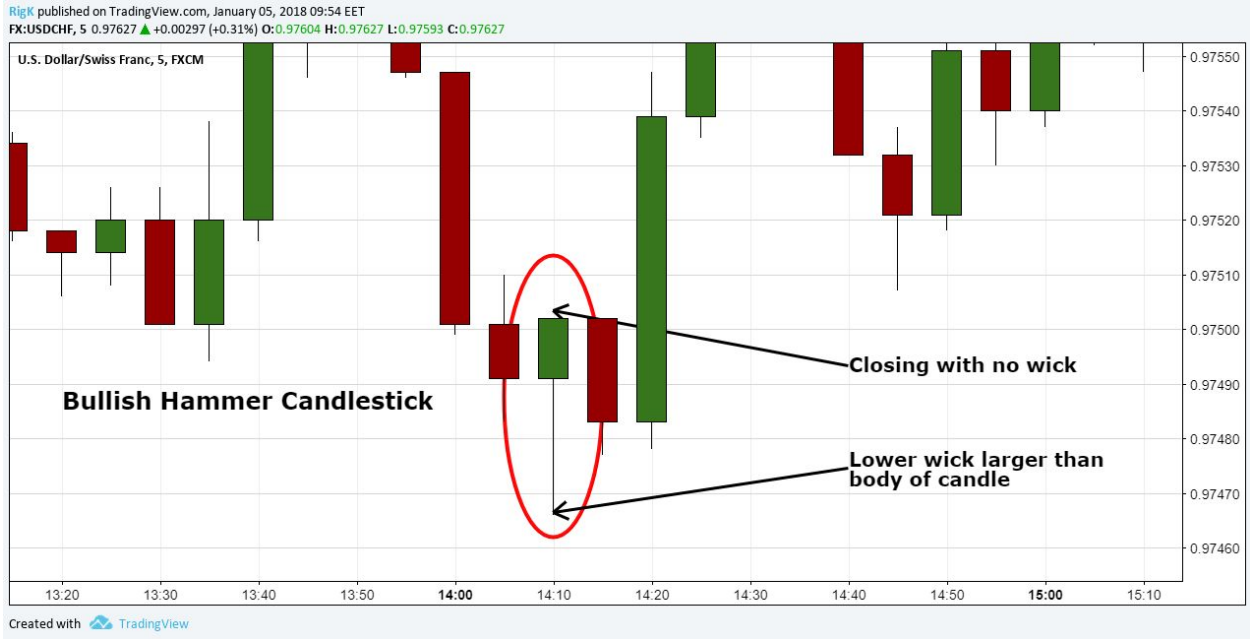

Below, you'll find chart examples of Bullish and Bearish variations of these 3 patterns.

Memorize them well so you can start to spot them on your own!

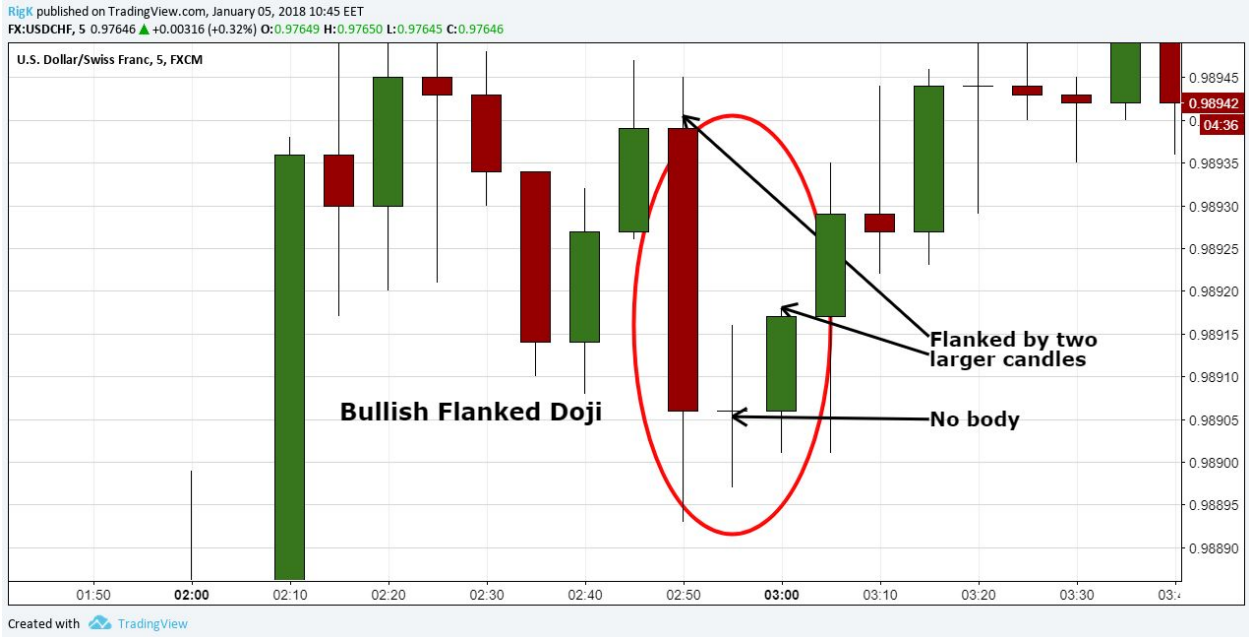

1. Reversal Candlesticks

2. Hammer Candlesticks

3. Flanked Doji's

These three patterns can provide us with *powerful* clues as to what a given market may do next, especially at important areas or levels we watch for reversals.

It doesn't matter what market or time frame you're trading, just pay attention to all the major swing highs/lows on your chart and you'll see these patterns popping up *over and over again*.

To your trading success,

Richard K
